Your software license agreement with Genesis.

As a valued customer, we want to ensure that you are aware of the terms of use for the software you have licensed from us. We believe it is important for you to understand the terms that govern the use of our software, and we encourage you to review them carefully.

Currently, Genesis offers two licensing models for the use of the Genesis Student Information System software. **ON-PREMISE** licensing and **CLOUD-HOSTED** licensing.

**ON-PREMISE Software License Grant**

Genesis allows the customer to host their Genesis SIS or SchoolFi software on their own infrastructure located on their premises. The software **cannot** be hosted on a 3rd party premise or infrastructure (such as AWS or Azure). All software and infrastructure required to run it is installed and maintained by the customer on their own premises. This includes all, but not limited to, Operating System, Database Server, Virtual Technology, hardware, Internet, personnel training, and ongoing maintenance. The license term is one school year.

**CLOUD-HOSTED Software License Grant**

SIS or SchoolFi software is installed, maintained, and supported by Genesis on the Genesis Cloud Infrastructure. The license term is one school year.

If you have any questions regarding our licensing options, or would like more information regarding our Cloud-Hosted option, please submit a support ticket.

Kind Regards,
